Severy, J.
FIRST CLINICAL STUDIES OF A NEW NEUROPLEGIC U. C. B. 3412. [1961] 5p.
Order from SLA $1.10 62-10266

Trans. of Acta Neurologica et Psychiatrica Belgica, 1960 [v. 60] no. 5, p. 520-524.

DESCRIPTORS: *Psychoses, *Drugs, Therapy, Dosage, Toxicity, *Phenothiazine derivatives.

The experimental product UCB 3412 shows great improvement over already known neuroplegic drugs. It gives practically no side effects and requires low dosage, allowing remarkable results in cases where all other treatments completely failed. It not only produces very satisfactory sedation; it also cancels delirious and even hallucinatory activities. (Author)
